

Multisens - 3934i

Pocket Vibration Analysis

Ultra Portable. User Friendly. Connected.

The Multisens-3934i App is a tool developed by SensOS with ultimate portability in mind. Use your iPhone or Android Device along with a triaxial wireless accelerometer as a portable Vibration Monitoring tool that allows you to perform Time and Frequency Domain Analysis as well as create pdf reports.

If you want to take it to the next level sign up for the full Multisens-3934 package and get full cloud capabilities for saving/loading reports and data, Machine Certification with embedded Machine Condition Detection along with the 3934 Vibration Analysis Studio iPad App.

Purchase now at pdm sensors.com

Key Features

- 1-3 Simultaneous Channels.
- 12800 Lines of FFT Resolution.
- TWF and Spectrum Cursors Auto/Manual adjustable High Peak and CPM.
- Spectrum Auto/Manual Adjustable Sidebands Active Cursors.
- Overall and Filtered Acceleration, Velocity and Displacement Readings.
- Send Reports via MMS, email, and all major messaging Apps.
- Save/Load Directly from Cloud Asset Tree.
- Company Asset Tree can have as many levels as required.
- Hazardous Location Sensor Available.

Upgrade to 3934 and access the following Modules

- 3D & 2D Orbit, Polar Plots.
- Spectrum Difference.
- Transmissibility Spectrum.
- Amplitude & Phase Spectra.
- Cross-Phase Spectrum.
- Vibration Logger.
- Bump-Test.
- WaterFall Plots.
